

● **Manager of the Bioimaging and Optics Core Facility (m/f)**

Institute of Science and Technology Austria

Our client - IST Austria - is a new graduate research institute which is located in Klosterneuburg (18 km from the Vienna city center). It performs basic research in the natural sciences at a worldclass level. www.ist.ac.at

Your responsibilities:

- Set-up of a facility equipped with excellent optical microscopes and image analysis tools
- Management of the facility (personnel, equipment, organization, maintenance)
- Providing training and advice to users
- Evaluation of new technologies of potential interest for the facility
- Evaluation of potential novel imaging technologies in collaboration with research groups
- Organization of practicals for graduate courses

Our Requirements:

- Diploma in natural/life sciences or engineering related to optical imaging
- Excellent knowledge and experience in optical microscopy and ideally image analysis
- Excellent managerial and administrative skills
- Good communication skills in English

We offer:

- A multifaceted position in a challenging international environment
- Competitive salary including generous social benefits and opportunities for further education and training
